

Inlet manifold GX160/GX200 for carburetor GX270

Installed view

The 90° carburetor assembly is ideal for the rental market because it increases the power of the Honda GX200 to the level of a GX270 engine, without having the disadvantage of the size or weight.

It generates a smoother power, with more torque, therefore making it easy to drive.

The performance of the 90° carburetor kit is improved when used with the C-Line EVO II muffler.

The 90° carburetor kit contains following parts:

- 1 x gasket Honda
ordernumber: 16212-ZH8-800
- 2 x stainless steel stud M6
- 1 x 90° Inlet manifold
- 1 x gasket Honda
ordernumber: 16221-ZA0-800
- 1 x Carburetor Honda 21mm
ordernumber: 16100-ZH9-821
- 1 x Air filter manifold
- 2 x stainless steel bolt M6
- 1 x cotton air filter
- 1 x spring support bracket
- 1 x throttle return spring
- 1 x breather pipe

90° Carburetor assembly

Inlet assembly 90°

Due to the fact that there is no increase in RPM, the increase in wear the of the engine is minimal.

The 90° inlet assembly is available with and without carburettor and as individual spare-parts.

Repositioning of engine is required on following rental karts:

- RIMO Kart
- DINO Kart
- Sodi-Kart
